# the r1 prompt handbook

rabbit™

intro

r1 is your personal ai assistant that fits in your pocket. you can press the button and talk to it to access its powerful features, like getting in-depth answers to complex questions, using features like translation or recording, or using the camera to superpower your searches. here's a guide to voice prompts for a wide range of everyday use cases.

converse with your r1

talk to your r1 in everyday language.

try these:

)) "tell me some motivational quotes"

)) "tell me a knock-knock joke"

)) "i'm feeling sad today. can you cheer me up?"

)) "tell me a bedtime story"

voice

get answers on the go

use powerful ai tools like perplexity and wolfram alpha to answer questions, explain even the most complex topics, pull up images, and give recommendations.

try these:

)) "what's the weather in my location?"

)) "search wolfram alpha and explain how g-force gravity works"

)) "check perplexity for when the paris olympics start"

)) "how can i get better sleep at night?"

)) "who is the lead singer of the killers?"

)) "what does the word 'ostensible' mean"

)) "what is 5 cups converted to liters?"

)) "give me a low-carb recipe for banana pancakes"

)) "can you explain the theory of relativity in simple terms"

)) "get me images of serena williams from the us open"

)) "can you recommend a book about zen buddhism?"

voice

ask follow-up questions

your r1 will understand what you're referring to without having to specify the exact details again.

try these:

))) "who wrote the song 'i feel for you' by chaka khan?"

└─ "play their most popular album"

))) "what is the most dangerous insect on earth?"

└─ "in what countries are they most commonly found?"

))) "look up pictures of chihuahuas"

└─ "what are some interesting facts about them?"

quick notes with voice

use r1 as your all-in-one note-taker. notes are available on rabbithole to search and view later.

try these:

-))) "save a note that says: 'i had a really good day today, met a new friend named ash from canada and her birthday is may 1, her horoscope sign is taurus. i also went on a hike and had dinner with my friends."

-))) "2 tbsp lemon juice, 2 tbsp mustard, 2 tbsp olive oil, salt and pepper makes a great salad dressing. save this as a note."

beta rabbit

beta rabbit is a new beta system built on top of rabbitOS that offers smarter, more thorough, and more accurate responses to complicated requests. ask for beta rabbit by starting your queries with "beta rabbit...". also available in vision mode!

try these:

))) "beta rabbit, can you suggest three books similar to 'the power of now', include page length, year of release, and ratings, and save that as a note titled 'reading list'. also include pictures of the authors"

　　　　└─ "beta rabbit, can you also get me summaries for those three books?"

))) "beta rabbit, can you give me a two-day itinerary for san francisco? i want to go to one historical site, a museum, eat japanese food and try a cocktail bar. can you also give me photos of each location?"

))) (in vision mode) "beta rabbit, what style is this painting? can you show me some more art works of this genre? what museum is it in?"

voice recording for all purposes

use r1 as your portable voice recorder. record meetings, summarize meeting notes, and record voice notes to be listened to later.

try these:

))) "start the meeting assistant"

))) "start a recording session for me"

timer & alarm

set a timer with everyday language and r1 will infer the details.

try these:

))) "set a timer for the perfect soft boiled egg" (or hard boiled/softer)

))) "set a timer for baking 6 oatmeal raisin cookies"

))) "set an alarm for 8 am every tuesday and thursday"

))) "how much time is left on my timer?"

))) "show me my alarms"

))) "cancel my 8 am alarm"

⦿ vision

vision mode understands your surroundings

use r1's camera to superpower your searches and help transcribe text.

double-click to open vision and push-to-talk:

))) "turn this table into a spreadsheet and send to me via email"

))) "can you suggest which pair of shoes i should wear with this outfit?"

))) "can you estimate how many calories are in a cup of orange juice?"

))) "can you summarize this text on the whiteboard"

))) "what can i cook with these ingredients?"

))) "take a look at this sheet and transcribe it for me"

))) "what does this sign say in english?"

magic camera

magic camera puts a retrofuturistic twist on photos you take with r1's camera. double-click to open vision mode, quick press ptt button to take a picture, and view your magic camera version in rabbithole. you can also use magic camera freestyle to speak your own custom style prompts.

double-click to open vision and push-to-talk. r1 will take a photo when you release push-to-talk:

))) "take a picture and dress us like we're in the tv show 'house of the dragon."

))) "take a picture of this and turn it into a pencil sketch."

))) "take a photo and make me lego-style"

music

play any song, playlist, genre, or mood on spotify or apple music.

try these:

))) "play the album 'computer world' by kraftwerk"

))) "play 'this is taylor swift playlist' on spotify"

))) "play 'here comes the sun'"

))) "play a song by imagine dragons"

))) "start a chill lofi study playlist"

))) "play some pumped up and motivational music on spotify"

))) "pause the music"

))) "skip to the next song"

services

call an uber or order food on doordash with just your voice.

for uber try:

🔊 "call me an uber from 123 broadway ave to 456 random st"

for food delivery try:

🔊 "order mexican food on doordash"

🔊 "order from starbucks on doordash"

yelp

find the best restaurants and shops in any location.

try these:

))) "search yelp for the best coffee shop in town"

))) "search yelp for the best gyms in santa monica"

voice

midjourney

easily access powerful generative image tools to mock up designs or visualize your thoughts.

try these:

))) "generate an image in a cartoon style of a rabbit eating a carrot"

))) "generate an image of a design for a racecar with cheese wheels"

))) "can you generate a logo for a wine shop, featuring pickles and cheese?"

suno

generate a rock song to fire you up, chill lofi track to study to, or a diss rap on the spot with suno.

try these:

))) "generate a reggae song that sings happy birthday sam"

))) "use suno to generate a modern chill wave pop song about a relaxing weekend in venice"

translation

use r1 to seamlessly translate between more than 100 languages instantly.

try these:

)) "start translating from french to english for me"

device voice control

use just your voice to control your device settings.

try these:

))) "turn the brightness to 50%"

))) "turn the volume down a bit"

))) "navigate to wifi settings"

))) "change the time zone to central time"
